

Dallas, TX, October 11, 2010 -Virtual Surveillance, the global leader in the network video market, announced today that [U.S. Immigration & Customs \(Homeland Security\)](#) has chosen Virtual Surveillance's Video Management System to be implemented throughout its California facilities.

This state of the art surveillance system employs high resolution PTZ (Pan Tilt Zoom) and vandal dome cameras recording high resolution video on a Digital Video Recorder (DVR) with 1TB of storage. Higher resolution enables security personnel to see details and to identify people and objects – a key consideration in video surveillance applications.

U.S. Citizenship and Immigration Services (USCIS) is the government agency that oversees lawful immigration to the United States. USCIS has 18,000 government employees and contractors working at 250 offices across the world.

Virtual Surveillance is a Texas-based company, operating nationwide with partners and integrators coast-to-coast. Virtual Surveillance's video surveillance systems are used for surveillance and protection of multi-site operations. As a direct importer of digital surveillance and security products, Virtual Surveillance provides extremely competitive pricing while maintaining rigorous product quality and reliability standards.
