

Dallas, TX, July 21, 2010 -Virtual Surveillance, the global leader in the network video market, announced today that The Salvation Army has chosen Virtual Surveillance's Video Management System to be implemented throughout its Texas divisional headquarters.

This state of the art surveillance system employs high resolution vandal dome and bullet cameras recording high resolution video on a Network Video Recorder (NVR) with 4TB hard drive space. Higher resolution enables security personnel to see details and to identify people and objects – a key consideration in video surveillance applications.

The Salvation Army is a Protestant Christian church known for its extensive philanthropy and charity work. It is an international movement with over 1.4 million members that currently work in over a 100 countries.

Virtual Surveillance is a Texas-based company, operating nationwide with partners and integrators coast-to-coast. Virtual Surveillance's video surveillance systems are used for surveillance and protection of multi-site operations. As a direct importer of digital surveillance and security products, Virtual Surveillance provides extremely competitive pricing while maintaining rigorous product quality and reliability standards.
